

I added the following 3 features:

- Where right word presents a quotation mark " or not as it means an end of sentence, for example : 57 network. EOS 58 "
- If a dots appears in left word like "... " for example : 9954 sympathy... NEOS
- The left word is a number 7251 2.5 TOK

The accuracies are in this screenshot:

```
Accuracy for the 5 features: 100.0  
Accuracy for the 8 features combined: 100.0  
Accuracy from the 3 features : 79.39068100358423
```
